

Staging server - Securing your staging server

All commands should be ran from the xubuntu VirtualBox VM unless noted otherwise.

[download and unzip the resource associated to the video lecture]

Make the deploy.sh script executable again

```
chmod +x deploy.sh
```

[edit the SERVER_IP's default value if yours is not 192.168.1.99]

Log in to the staging server VM and look at the iptables rules

```
sudo iptables -L
```

Configure the staging server's firewall

```
./deploy.sh -f
```

Log in to the staging server VM and implement the rules

```
sudo iptables-restore < /var/lib/iptables/rules-save
```

Log in to the staging server VM and look at the iptables rules again

```
sudo iptables -L
```
