

systemd - Creating your first unit files

[download and unzip the resource associated to the video lecture]

Make the deploy.sh script executable again

```
chmod +x deploy.sh
```

[edit the SERVER_IP's default value if yours is not 192.168.1.99]

Investigate all of the systemd units on the staging server

```
ssh you@192.168.1.99 systemctl list-unit-files
```

<Replace you with your username, or omit this if it's the same>

<Replace 192.168.1.99 with your server's IP if it is different>

Investigate what multi-user.target is

```
ssh you@192.168.1.99 systemctl show -p "Wants" multi-user.target
```

<Replace you with your username, or omit this if it's the same>

<Replace 192.168.1.99 with your server's IP if it is different>
