Obtaining an SSL cert - Signing up with a better authority

Since I don't have any domains to purchase an SSL certificate for. I am only providing a step by step on how to create a certificate with SSLMate.

It's really simple. Just head over to https://sslmate.com/ and view the demo on the bottom of their page. Then sign up for an account, pick the certificate type you want and do what they did in the demo video.

You'll likely want the Standard SSL certificate which is $15.95 per year. In my experience, the verification process usually takes 1-3 hours. Keep your eyes peeled in your inbox.
